

SOLUTION BRIEF

XM FAX CONNECTOR FOR ECOPY SHARESCAN

Multifunction printers (or MFPs) are an essential part of today's business infrastructure. Many companies are taking advantage of the ease of combining copying, scanning and faxing functionalities in a single peripheral.

XMedius has designed connectors that enable the seamless integration of its fax solutions with multifunction printers (MFPs). Through the use of a XMedius developed connector, the functionality of all MFPs is extended to include value added faxing capabilities from the XM Fax On-Premises and Cloud solutions.

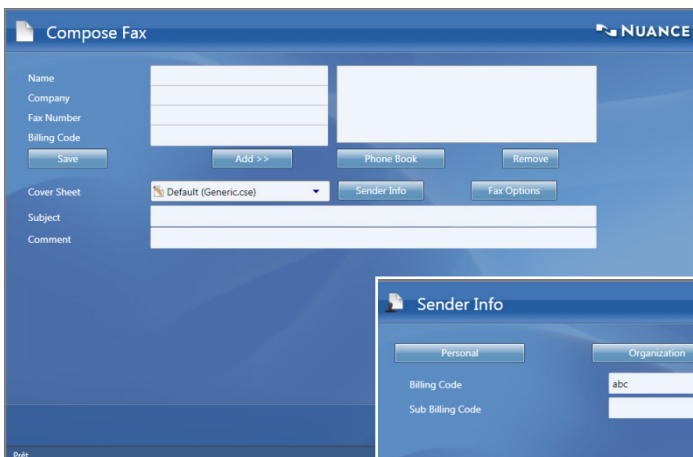

The XM Fax eCopy ShareScan connector is designed to work with XM Fax On-Premises (6.5.5 version and above) and Cloud solutions. The XM Fax eCopy ShareScan connector allows users to easily fax documents from multifunction printers and digital copiers networked on a PSTN- or VoIP-based infrastructure. Users can benefit from many features found in XM Fax On-Premises or Cloud solutions, available directly on the MFP console. For example, users can select recipients from the Fax Service phone books and add new entries to their personal contacts.

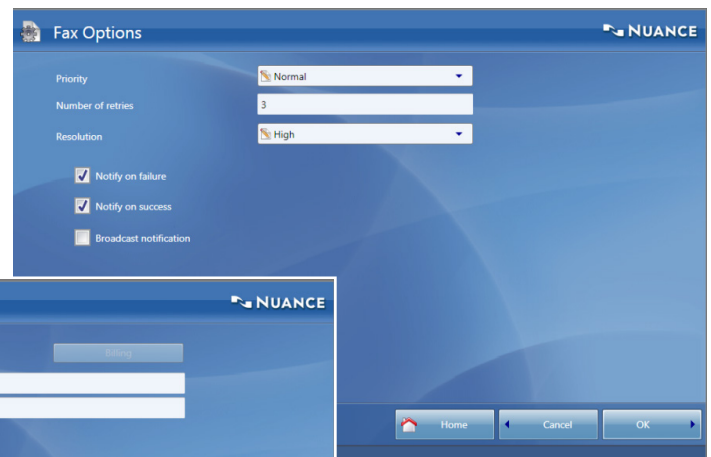

PREREQUISITES

All MFPs deploying XM Fax eCopy ShareScan connectors must:

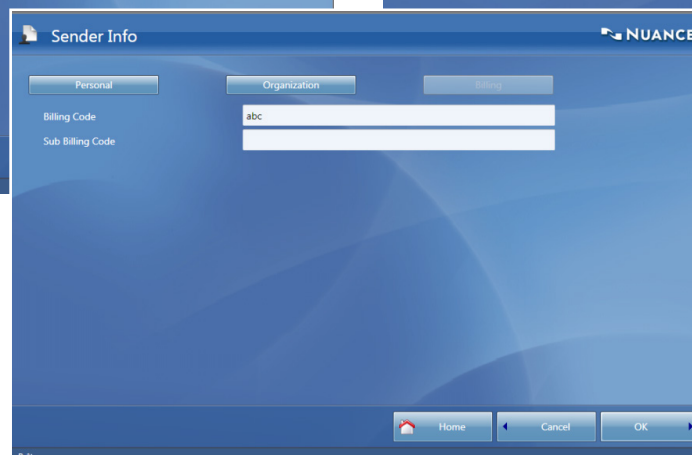

- › Use the eCopy ShareScan Software version 5.0 and above.
- › Have a panel screen with a minimum resolution of 640x190.
- › Be registered on the computer hosting the eCopy ShareScan Software.
- › Have an active fax service account with XMedius (for Cloud-Based fax solution only).

CONNECTOR BENEFITS

The eCopy ShareScan connector accelerates and streamlines document management. The connector creates audit trails to facilitate regulatory compliance, while greatly reducing telecom, long-distance and fax hardware costs; it also offers a rapid ROI. With the eCopy ShareScan connector, users can benefit from the feature rich XM Fax On-Premises and Cloud solutions directly from the MFPs associated with a network.

FUNCTIONALITIES	BENEFITS
TRACEABLE FAXES	<ul style="list-style-type: none"> › All faxes can be tracked, logged and archived
FAX AUTHENTICATION METHODS	<ul style="list-style-type: none"> › A number of fax user authentication options can be configured to ensure security: <ul style="list-style-type: none"> • Default user (without password) • FaxServer (XM Fax internal user address and password) • External authentication methods (Active Directory)* <p style="text-align: right;"><i>*On-Premises version only</i></p>
ENCRYPTION FEATURES	<ul style="list-style-type: none"> › Communication between the XM Fax eCopy ShareScan Connector and XM Fax is always encrypted › The encryption features enable privacy and compliance (GDPR, HIPAA, Sarbanes-Oxley)
SMART INTUITIVE MFP PANEL INTERFACE	<ul style="list-style-type: none"> › The single intuitive interface on the MFP panel allows seamless interoperability and product compatibility › Time is saved by extending advanced capabilities found within the fax server solution onto the MFP, including: phonebook, cover sheet selection, user preference, billing codes, etc.
DIRECT DELIVERY TO AUTHENTICATED RECIPIENT INBOX	<ul style="list-style-type: none"> › The employees' efficiency is increased as they no longer have to wait by the MFP for fax confirmation › The privacy of the fax is protected by ensuring delivery to the intended recipient
REAL-TIME FAX QUEUE ACCESS	<ul style="list-style-type: none"> › Users can get real time access to their faxing activity from any multifunction printer across all office locations on the network
ADMINISTRATOR CONTROL	<ul style="list-style-type: none"> › Administrators have full visibility to view the entire fleet of registered devices with the help of a configuration tool
EDITABLE FAX OPTIONS	<ul style="list-style-type: none"> › The XM Fax eCopy ShareScan connector provides a way to change fax options (such as priority, sending re-tries and notification settings for the fax being sent)
SIMPLIFIED INTERFACE OPTION	<ul style="list-style-type: none"> › The XM Fax eCopy ShareScan connector can be configured to display its full option interface when composing a fax, or a simplified interface (fax number field only) to enable quick faxing
MULTILINGUAL SUPPORT	<ul style="list-style-type: none"> › The configuration interface is now available in English, French and German › For ease of use, the user interface is available in 7 languages: English, French, German, Spanish, Italian, Portuguese and Russian

FASTER & EASIER FAXING FOR MFPS AND COPIERS

1. SELECT XM FAX

At your MFP or copier, simply select XM Fax for automated faxing.

2. SCAN YOUR DOCUMENT

Scan your document, add the recipient information and the cover page will be created for you. The user-friendly eCopy ShareScan connector captures fax coversheet data and automatically merges sender and recipient information for faxing through your XM Fax fax server.

3. SEND YOUR FAX

After you send your fax, you will receive a fax transmission status report in your email inbox - no need to wait beside your device. With XM Fax, inbound faxes are sent to your email inbox for handling like any other electronic document on your PC.

ADVANCED FAXING OPTIONS

Extend your faxing power with:

- › Active Directory integration
- › Addition of users to the phonebook
- › User login
- › Failed-fax resubmission from your PC
