Fuji Xerox XM Fax

XM Fax™ Fuji Xerox Apeos connector

Multifunction Printers (or MFPs) are an important part of today's business communication infrastructure. Many companies are choosing to streamline their document management activities by using a single MFP to access copying, scanning and faxing functionalities. XM Fax Fuji Xerox Apeos Connector allows users to easily fax documents from supported Fuji Xerox multifunction printers. Plus, XM Fax and the Apeos Connector will work in an analog, digital, or Voice-over-IP environment without the need for special hardware like ATA's.

The XM Fax Fuji Xerox Apeos Connector allows users to easily, securely, and cost-effectively exchange documents. The solution allows Fuji Xerox Apeos Port-IV Multi-Function Devices (MFDs) that are compatible with Apeos iiX platform to fax documents through the XM Fax On-Premises solution. XM Fax leverages the power of a vast range of other IT investments, including advanced routing and switching, analog or IP telephony, and active directories.

The connector is compatible with XM Fax versions 7.5 and above.

Supported versions

All MFPs deploying XM Fax Fuji Xerox Apeos Connector must:

- Be part of the Fuji Xerox ApeosPort-IV series.
- Include the Fuji Xerox's Apeos iiX platform (Apeos Internet Integration based on XML and SOAP).
- Include the EWB (Web browser), version 4 (minimum).
- Have a panel screen with a resolution of SVGA (800x600) or WVGA (800x480).
- Be connected to the same network to communicate with the computer hosting the XM Fax Fuji Xerox Apeos Connector.

Connector benefits

The XM Fax Fuji Xerox Apeos Connector accelerates and streamlines document management. The connector creates audit trails to facilitate regulatory compliance, while greatly reducing telecom, long-distance and fax hardware costs; it also offers a rapid ROI.

With the XM Fax Fuji Xerox Apeos Connector, users can benefit from the feature rich XM Fax On-Premises solution directly from the control panel of Fuji-Xerox MFPs associated with a particular network.

Functionalities / Benefits

Traceable faxes

- All faxes are tracked, logged and archived, creating regulatory compliant audit trails

Fax authentication methods

- A number of fax user authentication options can be configured to ensure security:
 - Default user per individual MFD (without password)
 - Fax server (XM Fax internal user address and password)
 - External authentication (Active or other Directory)

Encryption features

- Communication between the XM Fax Fuji Xerox Apeos connector and XM Fax is always encrypted
- The connector and XM Fax enable compliance (HIPAA, Sarbanes-Oxley)

Smart intuitive MFP panel interface

- The single intuitive interface on the MFP enhances user satisfaction while reducing training costs
- Efficiency is increased by extending advanced capabilities found within the XM Fax fax server solution onto the multifunction printer, including: phonebook, cover sheet selection, user preference, billing codes, etc.

Direct delivery to authenticated recipient inbox

- No more waiting by the MFP for fax confirmation or reception
- The fax privacy is ensured by delivering incoming faxes directly to the intended recipient(s)

Real-time fax queue access

- Users can get real time access to their faxing activity from any multifunction printer across all office locations on the network

Centralized administrator console

- Administrators save time by configuring, monitoring and controlling all MFPs from any web browser

Editable fax options

- The connector features adjustable fax options (such as priority, sending retries and notification settings for the fax being sent)

Simplified interface option

- The connector can be configured to display its full option interface when composing a fax, or a simplified interface, offering users the same fax experience they are used to (dial the number, then hit send)

Multilingual support

- The configuration interface and the user interface are available in English, Japanese and Chinese (simplified)

Advanced faxing options

- Extend your faxing power with:
- Active Directory integration
- Addition of users to the phonebook
- User login
- Failed-fax resubmission from your PC

Advanced faxing options

Faster & easier faxing for MFDs and copiers

1. Select XM Fax

At your MFP or copier, simply select XM Fax for automated faxing.

2. Scan Your Document

Scan your document, add the recipient information and the cover sheet will be created for you. The user-friendly Fuji Xerox Apeos connector captures fax coversheet data, and automatically merges sender and recipient information for faxing through your XM Fax fax server.

3. Send Your Fax

After you send your fax, you will receive a fax transmission status report in your email inbox – no need to wait beside your device. With XM Fax, inbound faxes are sent to your email inbox for handling like any other electronic document on your PC.

Conclusion

The release of XM Fax Fuji Xerox Apeos Connector offers numerous benefits to organizations using MFPs for their document management needs. This specially developed connector allows companies to fully leverage XM Fax's best in class faxing technology to meet all their faxing needs directly from a compatible MFP.
