

SOLUTION BRIEF

XM FAX CONNECTOR FOR LEXMARK ESF

Multifunction Printers (or MFPs) are an essential part of today's business infrastructure. Many companies are taking advantage of the ease of combining printing, copying, scanning and faxing functionalities in a single peripheral.

XMedius has designed connectors that enable the seamless integration of its fax solutions with Lexmark multifunction printers. Through the use of a XMedius developed connector, the functionality of all compatible Lexmark MFPs is extended to include faxing capabilities from the XM Fax™ On-Premises and Cloud solutions.

The XM Fax Lexmark eSF connector is the latest solution allowing Lexmark eSF compatible multifunction printers to fax documents through XM Fax solutions. The connector is compatible with XM Fax on-Premises versions 7.5 and above, as well as XM Fax Cloud.

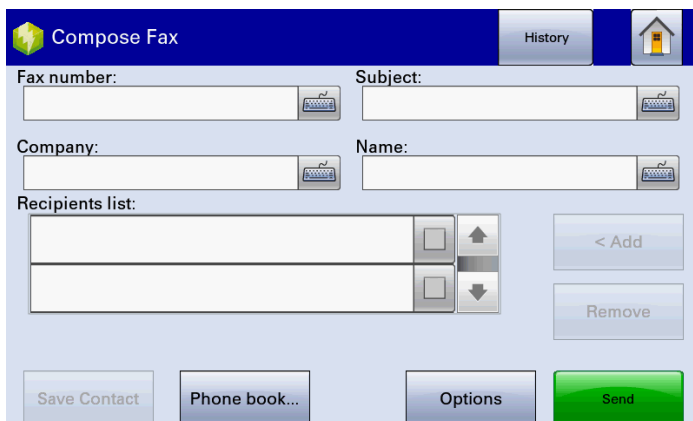

The XM Fax Lexmark eSF connector allows users to easily fax documents from multifunction printers and digital copiers networked on a PSTN- or VoIP-based infrastructure. Users can benefit from many features found in XM Fax On-Premise or Cloud solutions, available directly on the MFP console. For example, users can select recipients from the Fax Service phone books and add new entries to their personal contacts.

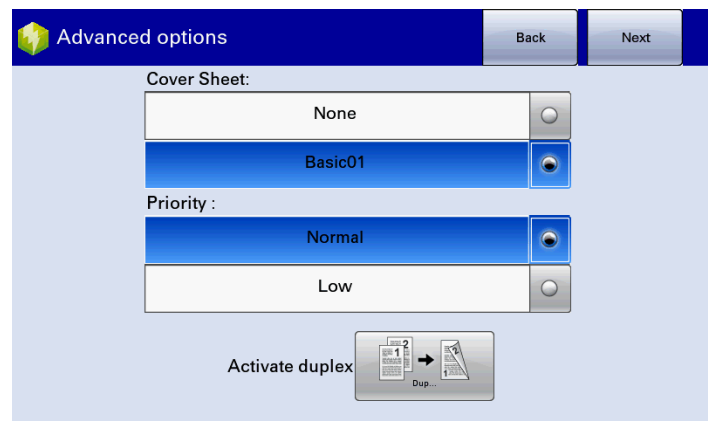

SUPPORTED VERSIONS

All MFPs deploying XM Fax Lexmark eSF connectors must:

- › Be compatible with the Lexmark Embedded Solutions Framework (eSF), version 4.1
- › Have a panel screen with a resolution of 800x380 pixels
- › Be configured to use SSL with a Self-Signed Certificate
- › Have a hard drive
- › With the XM Fax Cloud solution, an active fax service account with XMedius is required

CONNECTOR BENEFITS

The Lexmark eSF connector accelerates and streamlines document management. The connector creates audit trails to facilitate regulatory compliance, while greatly reducing telecom, long-distance and fax hardware costs; it also offers a rapid ROI.

With the Lexmark eSF connector, users can benefit from the feature rich XM Fax On-Premise and XM Fax Cloud solutions directly from the Lexmark MFPs associated with a network.

FUNCTIONALITIES	BENEFITS
TRACEABLE FAXES	<ul style="list-style-type: none"> › All faxes can be tracked, logged and archived
FAX AUTHENTICATION METHODS	<ul style="list-style-type: none"> › A number of fax user authentication options can be configured to ensure security: <ul style="list-style-type: none"> • Default user (without password) • FaxServer (XM Fax internal user address and password) • External authentication methods (Active Directory)* <p style="text-align: right;"><i>*On-Premises version only</i></p>
ENCRYPTION FEATURES	<ul style="list-style-type: none"> › Communication between the XM Fax Lexmark eSF connector and XM Fax is always encrypted › The encryption features enable privacy and compliance (HIPAA, Sarbanes-Oxley)
SMART INTUITIVE MFP PANEL INTERFACE	<ul style="list-style-type: none"> › The single intuitive interface on the MFP panel allows seamless interoperability and product compatibility › Time is saved by extending advanced capabilities found within the fax server solution on to the MFP, including: phone book, cover sheet selection, user preference, billing codes, etc.
DIRECT DELIVERY TO AUTHENTICATED RECIPIENT INBOX	<ul style="list-style-type: none"> › The employees' efficiency is increased as they no longer have to wait by the MFP for fax confirmation › The privacy of the fax is protected by ensuring delivery to the intended recipient
REAL-TIME FAX QUEUE ACCESS	<ul style="list-style-type: none"> › Users can get real time access to their faxing activity from any multifunction printer across all office locations on the network
ADMINISTRATOR CONTROL	<ul style="list-style-type: none"> › Administrators have full visibility to view the entire fleet of registered devices with the help of a configuration tool
EDITABLE FAX OPTIONS	<ul style="list-style-type: none"> › The XM Fax Lexmark eSF connector provides a way to change fax options (such as priority, sending re-tries and notification settings for the fax being sent)
SIMPLIFIED INTERFACE OPTION	<ul style="list-style-type: none"> › The XM Fax Lexmark eSF connector can be configured to display its full option interface when composing a fax, or a simplified interface (fax number field only) to enable quick faxing
MULTILINGUAL SUPPORT	<ul style="list-style-type: none"> › The configuration interface is available in English, French and German › For ease of use, the user interface is available in 7 languages: English, French, German, Spanish, Italian, Portuguese and Russian

FASTER & EASIER FAXING FOR MFPS AND COPIERS

1. SELECT XM FAX

At your MFP or copier, simply select XM Fax for automated faxing.

2. SCAN YOUR DOCUMENT

Scan your document, add the recipient information and the cover page will be created for you. The user-friendly Lexmark eSF connector captures fax coversheet data, and automatically merges sender and recipient information for faxing through your XM Fax fax server.

3. SEND YOUR FAX

After you send your fax, you will receive a fax transmission status report in your email inbox - no need to wait beside your device. With XM Fax, inbound faxes are sent to your email inbox for handling like any other electronic document on your PC.

ADVANCED FAXING OPTIONS

- › Extend your faxing power with:
- › Active Directory integration
- › Addition of users to the phone book
- › User login
- › Failed-fax resubmission from your PC

TARGET INDUSTRIES

CONCLUSION

The integration of the XM Fax Lexmark eSF connector offers numerous benefits to organizations using MFPs for their document management needs. This specially developed connector allows companies to fully leverage XM Fax's best in class faxing technology to meet all their faxing needs directly from a MFP.
